TC ID	Module	Test Scenario	Preconditions
LOGIN-001	Login	Verify login page loads successfully	User is logged out
LOGIN-002	Login	Verify Login tab is available and selected	Login page is open
LOGIN-003	Login	Verify Select User option	Login page is open
LOGIN-004	Login	Login with valid credentials	Valid test account exists
LOGIN-005	Login	Login with incorrect password	Login page is open
LOGIN-006	Login	Login with space after the email	Login page is open
LOGIN-007	Login	Login with space after the Password	Login page is open
LOGIN-008	Login	Login with space before the email	Login page is open
LOGIN-009	Login	Login with space before the Password	Login page is open
LOGIN-010	Login	Login with invalid/non-existent email	Login page is open
LOGIN-011	Login	Submit login with both fields empty	Login page is open
LOGIN-012	Login	Submit login with empty email	Login page is open
LOGIN-013	Login	Submit login with empty password	Login page is open
LOGIN-014	Login	Verify email format validation	Login page is open
LOGIN-015	Login	Verify password is masked by default	Login page is open
LOGIN-016	Login	Verify show/hide password functionality	Login page is open
LOGIN-017	Login	Verify Forgot Password navigation	Login page is open
LOGIN-018	Login	Verify Login button functionality	Valid credentials available
LOGIN-019	Login	Verify login using Enter key	Login page is open
LOGIN-020	Login	Verify tab-key navigation through login controls	Login page is open

LOGIN-021	Login	Verify Register navigation	Login page is open
LOGIN-022	Login	Verify Google authentication option	Login page is open
LOGIN-023	Login	Verify Microsoft authentication option	Login page is open
LOGIN-024	Login	Verify Apple authentication option	Login page is open
LOGIN-025	Login	Verify SSO authentication option	Login page is open
LOGIN-026	Login	Verify language selector	Login page is open
LOGIN-027	Login	Verify Privacy Settings	Login page is open
LOGIN-028	Login	Verify login page after browser refresh	Login page is open
LOGIN-029	Login	Verify successful login session persists after refresh	User is logged in
LOGIN-030	Login	Verify logout prevents access to protected page	User is logged in
LOGIN-031	Login	Verify login recovery after failed authentication	Login page is open
LOGIN-032	Login	Verify login page does not expose password in plain text by default	Login page is open
LOGIN-033	Login	Verify login page supports browser back/forward navigation appropriately	Login page is open
LOGIN-034	Authentication / MFA	Verify successful authentication flow with MFA configuration and validation	Valid account credentials are available; MFA is not configured or requires configuration

LOGIN-035	Authentication / Session	Verify browser navigation does not allow authenticated user to return to Login/MFA after successful authentication	User has successfully completed Login + MFA and is on the Clusterix homepage
LOGIN-036	Privacy Settings	Verify Privacy Settings options and consent controls work correctly	Login page is open and Privacy Settings is available
LOGIN-037	Authentication	Verify user can repeatedly login and logout successfully	Valid account credentials are available
LOGIN-038	Authentication / Session	Verify homepage must be logged out once day ends/Session time must be handled	User is logged over 24hour and more
LOGIN-039	Login / Localization	Verify selected language is retained after successful login	Login page is open and multiple languages are available
LOGIN-040	Login	Verify login page contains all expected authentication methods	Login page is open
LOGIN-041	Login	Verify error handling when attempting to log in with an unregistered account	Login page is open
LOGIN-042	Login	Verify password is not exposed in the DOM/HTML when entered in a masked password field	Login page is open

LOGIN-043	Login	Verify Clusterix logo navigation does not unexpectedly reload the login page or clear entered credentials	Login page is open

Test Steps	Test Data	Expected Result
1. Navigate to Clusterix login URL	Clusterix login URL	Login page loads successfully without UI errors. All expected login elements are visible.
1. Observe top-right navigation	N/A	Login option is visible and identified as the active authentication option.
1. Click Select User	N/A	User selection functionality opens successfully and allows the user to select an available user, if applicable.
1. Enter valid email 2. Enter valid password 3. Click Login	Valid test credentials	User is authenticated successfully and redirected to the expected Clusterix landing page.
1. Enter valid email 2. Enter incorrect password 3. Click Login	Valid email + incorrect password	Login is rejected and a clear authentication error is displayed. User remains on login page.
1. Enter valid email with a space 2. Enter correct password 3. Click Login	Valid test credentials	Login is rejected and a clear authentication error is displayed. User remains on login page.
1. Enter valid email 2. Enter correct password add a space 3. Click Login	Valid test credentials	Login is rejected and a clear authentication error is displayed. User remains on login page.
1. Enter valid email with a space in the begining 2. Enter correct password 3. Click Login	Valid test credentials	Login is rejected and a clear authentication error is displayed. User remains on login page.
1. Enter valid email 2. Enter correct password add a space in the begining 3. Click Login	Valid test credentials	Login is rejected and a clear authentication error is displayed. User remains on login page.
1. Enter invalid/non-existent email 2. Enter password 3. Click Login	Invalid email + password	Login is rejected and an appropriate error/validation message is displayed.
1. Leave email empty 2. Leave password empty 3. Click Login	Blank fields	Login is not submitted. Required-field validation is displayed appropriately.
1. Leave email empty 2. Enter password 3. Click Login	Blank email	Login is prevented and email validation is displayed.
1. Enter valid email 2. Leave password empty 3. Click Login	Blank password	Login is prevented and password validation is displayed.
1. Enter invalid email format 2. Enter password 3. Submit	test / malformed email	Invalid email format is rejected or appropriate validation is displayed.
1. Click password field 2. Enter password	Valid test password	Password characters are hidden/masked by default.
1. Enter password 2. Click eye/show-hide icon	Valid test password	Password visibility toggles correctly between masked and visible states.
1. Click Forgot password?	N/A	User is taken to the password recovery/reset flow.
1. Enter valid credentials 2. Click Login	Valid test credentials	Login button submits credentials and authentication completes successfully.
1. Enter valid credentials 2. Place cursor in password field 3. Press Enter	Valid test credentials	Login is submitted without requiring a mouse click on Login.
1. Use Tab repeatedly from browser/page focus 2. Observe focus order	N/A	Keyboard focus moves through interactive login controls in a logical order.

1. Click Register	N/A	Registration page/flow opens successfully.
1. Click Google icon	Authorized Google test account, if available	Google authentication flow opens and behaves correctly.
1. Click Microsoft icon	Authorized Microsoft test account, if available	Microsoft authentication flow opens and behaves correctly.
1. Click Apple icon	Authorized Apple test account, if available	Apple authentication flow opens and behaves correctly.
1. Click SSO	Authorized SSO account, if available	SSO authentication flow opens and behaves correctly.
1. Click language selector showing EN 2. Review available languages 3. Select another available language	Available language	Language menu opens and selected language is applied correctly to supported login-page content.
1. Click Privacy settings	N/A	Privacy settings interface opens successfully and allows available privacy options to be viewed/managed.
1. Refresh browser	N/A	Login page reloads successfully without broken UI or unexpected errors.
1. Login successfully 2. Refresh browser	Valid test credentials	User remains authenticated after refresh and is not unexpectedly redirected to login.
1. Logout 2. Use browser Back or navigate directly to protected page	Protected Clusterix URL	User cannot access protected content after logout and is redirected to login/authentication when required.
1. Attempt login with incorrect credentials 2. Correct the credentials 3. Login again	Invalid then valid credentials	Failed login does not leave the form in a broken state. User can correct credentials and successfully log in.
1. Enter password 2. Observe password field	Valid test password	Password is not displayed in plain text unless the user explicitly selects show-password.
1. Navigate between login and another accessible page 2. Use browser Back/Forward	N/A	Browser navigation does not cause unexpected application errors or broken authentication state.
1. Enter valid username/email and password. 2. Submit login. 3. Verify user is redirected to MFA screen. 4. If MFA is not configured, verify MFA configuration is requested. 5. Attempt to continue with an incorrect MFA code. 6. Verify access to the application is denied. 7. Enter the correct MFA code. 8. Verify user is redirected to the Clusterix homepage.	Valid credentials + invalid MFA code followed by valid MFA code	User must complete the MFA requirement before accessing the application. Incorrect MFA must not grant access. After successful MFA verification, the user is redirected to the homepage.

1. Complete Login and MFA successfully. 2. Confirm user reaches homepage. 3. Click browser Back. 4. Observe whether Login/MFA screens become accessible. 5. Click browser Forward and observe navigation. 6. Separately verify browser Back navigation from the Login → MFA stage before completing authentication.	Valid credentials + valid MFA	After successful authentication, browser Back should not expose an accessible Login/MFA state or allow the user to bypass/re-enter authentication unexpectedly. During the Login → MFA flow, browser Back should navigate to the previous authentication step as designed.
1. Open Privacy Settings. 2. Review Marketing, Functional, and Essential categories. 3. Toggle available consent options. 4. Select Save Services / Deny / Accept All. 5. Reopen Privacy Settings and verify the selected preferences.	Consent preferences	Privacy Settings should open correctly, allow available preferences to be changed, and save the selected consent settings successfully.
1. Login with valid credentials. 2. Logout. 3. Repeat the Login → Logout flow multiple times. 4. Observe whether any unexpected restriction or failure occurs.	Valid credentials	User should be able to successfully login and logout repeatedly without unexpected restrictions or errors. Each logout should terminate the authenticated session.
1. Login successfully. 2. Navigate to homepage. 3.Stay logedin	Valid authenticated session	Expecting a session out time, currently its logged in always
1. Select a language other than the default. 2. Log in with valid credentials. 3. Observe the language after landing on the application. 4. Navigate to another module/page and verify the selected language remains unchanged.	Selected non-default language + valid credentials	The selected language should persist after successful authentication and remain applied across the application/session.
1. Inspect authentication section	N/A	Email/password login plus displayed Google, Microsoft, Apple and SSO options are present and visually usable.
1. Enter an email address that is not registered. 2. Enter any password. 3. Click Login.	Unregistered email + password	Login attempt is rejected and a clear, appropriate error message is displayed. User remains on the login page and is not authenticated.
1. Enter a password in the password field. 2. Confirm the password is visually masked. 3. Open browser Developer Tools. 4. Inspect the password input element. 5. Check whether the entered password is exposed as a DOM attribute/value or other client-side content.	Test account password	Password should remain protected and should not be unnecessarily exposed as a readable value in the DOM/HTML or other client-side representation.

1. Enter a valid email address. 2. Enter a password. 3. Click the Clusterix logo. 4. Observe the URL, page behavior, and entered form data.	Test email + test password	Logo should perform its intended navigation without unexpectedly reloading the login page or clearing the user's entered form data.

TC ID	Module	Test Scenario
REG-001	Registration	Verify Registration page loads successfully
REG-002	Registration	Verify registration with personal email is rejected
REG-003	Registration	Verify company email can be entered
REG-004	Registration	Verify invalid email format is rejected
REG-005	Registration	Verify first name field accepts valid input
REG-006	Registration	Verify last name field accepts valid input
REG-007	Registration	Verify password requires lowercase character
REG-008	Registration	Verify password requires uppercase character
REG-009	Registration	Verify password requires a digit
REG-010	Registration	Verify password requires a special character
REG-011	Registration	Verify password minimum length is enforced
REG-012	Registration	Verify password maximum length is enforced
REG-013	Registration	Verify password of exactly 12 characters is accepted
REG-014	Registration	Verify password of exactly 20 characters is accepted
REG-015	Registration	Verify password longer than 20 characters is rejected

REG-016	Registration	Verify confirm-password mismatch is handled
REG-017	Registration	Verify matching passwords are accepted
REG-018	Registration	Verify password masking on registration page
REG-019	Registration	Verify show/hide password functionality
REG-020	Registration	Verify Terms of Service checkbox is required
REG-021	Registration	Verify Terms of Service can be accepted
REG-022	Registration	Verify successful registration with valid data
REG-023	Registration	Verify registration with an already registered company email
REG-024	Registration	Verify required fields cannot be submitted empty
REG-025	Registration	Verify registration form retains validation state correctly
REG-026	Registration	Verify registration validation messages change according to selected language
REG-027	Registration	Verify registration password is not exposed in the DOM

Preconditions	Test Steps	Test Data
User is logged out	1. Navigate to Login page. 2. Click Register.	N/A
Registration page is open	1. Enter a personal email address. 2. Complete other required fields.	example@gmail.com
Registration page is open	1. Enter a valid company email address.	Valid company email
Registration page is open	1. Enter an invalid email format. 2. Complete remaining fields.	test@
Registration page is open	1. Enter a valid first name.	Harshitha
Registration page is open	1. Enter a valid last name.	Gowda
Registration page is open	1. Enter a password without lowercase characters.	QWERT@123456
Registration page is open	1. Enter a password without uppercase characters.	qwert@123456
Registration page is open	1. Enter a password without a numeric digit.	Qwert@abcdef
Registration page is open	1. Enter a password without a special character.	Qwert123456
Registration page is open	1. Enter a password shorter than 12 characters.	11-character valid-format password
Registration page is open	1. Enter a password longer than 20 characters.	21-character password
Registration page is open	1. Enter a password containing all required character types. 2. Ensure exactly 12 characters are used.	Valid 12-character password
Registration page is open	1. Enter a password containing all required character types. 2. Ensure exactly 20 characters are used.	Valid 20-character password
Registration page is open	1. Enter a valid-format password containing 21+ characters.	21+ character password

Registration page is open	1. Enter a valid password. 2. Enter a different value in confirm password.	Qwert@123456 / Qwert@123457
Registration page is open	1. Enter a valid password. 2. Enter the same password in confirmation field.	Same valid password
Registration page is open	1. Enter a password. 2. Observe password field.	Test password
Registration page is open	1. Enter password. 2. Click password visibility icon. 3. Click again.	Test password
Registration page is open	1. Complete all required registration fields. 2. Leave Terms checkbox unchecked. 3. Attempt registration.	Valid registration data
Registration page is open	1. Complete required fields. 2. Select Terms of Service checkbox.	Valid registration data
Registration page is open	1. Enter valid company email. 2. Enter valid first/last name. 3. Enter valid 12–20 character password. 4. Confirm password. 5. Accept Terms. 6. Submit registration.	Valid registration data
Existing account is available	1. Enter an email already registered in the system. 2. Complete valid registration details. 3. Submit.	Existing company email
Registration page is open	1. Leave required fields empty. 2. Attempt registration.	Blank fields
Registration page is open	1. Enter invalid data. 2. Trigger validation. 3. Correct the invalid data.	Invalid → valid data
Registration page is open	1. Select English and trigger a validation error. 2. Select Deutsch and trigger the same validation error. 3. Repeat for available languages as required.	Invalid password
Registration page is open	1. Enter a test password. 2. Confirm field is visually masked. 3. Inspect the password input using browser Developer Tools. 4. Check the DOM/client-side representation.	Dummy test password

Expected Result	Priority	Type	Status
Registration page loads successfully and all required registration fields are displayed.	High	Functional / UI	PASS
Registration is prevented and a clear message indicates that personal email addresses are not allowed and a company email must be used.	High	Negative / Validation	PASS
Company email is accepted without the personal-email validation message.	High	Validation	PASS
Appropriate email validation is displayed and registration cannot proceed.	High	Negative / Validation	PASS
First name is accepted and displayed correctly.	Medium	Functional	PASS
Last name is accepted and displayed correctly.	Medium	Functional	PASS
Password is rejected and validation indicates that a lowercase character is required.	High	Validation	PASS
Password is rejected and validation indicates that an uppercase character is required.	High	Validation	PASS
Password is rejected and validation indicates that a digit is required.	High	Validation	PASS
Password is rejected and validation indicates that a special character is required.	High	Validation	PASS
Password is rejected and minimum length validation is displayed.	High	Boundary / Validation	PASS
Password is rejected or prevented according to the defined 20-character maximum.	High	Boundary / Validation	PASS
Password satisfies the stated minimum length and character requirements.	High	Boundary	PASS
Password satisfies the stated maximum length and character requirements.	High	Boundary	PASS
Password does not satisfy the stated 12–20 character requirement and registration cannot proceed.	High	Boundary	PASS

Registration is prevented and Passwords do not match validation is displayed.	High	Negative / Validation	PASS
Password mismatch validation is removed and the fields are accepted.	High	Functional	PASS
Password is masked by default.	High	Security / UI	PASS
Password visibility toggles correctly between masked and visible states.	Medium	Functional / Security	PASS
Registration is prevented and user is required to accept the Terms of Service.	High	Validation	PASS
Checkbox can be selected and registration can proceed to the next validation/submission stage.	High	Functional	PASS
Registration completes successfully and user receives the expected confirmation/activation/login flow.	Critical	E2E	PASS
Registration is rejected and an appropriate message informs the user that the account/email already exists.	High	Negative / E2E	PASS
Registration is prevented and appropriate required-field validation is displayed.	High	Validation	PASS
Validation messages clear/update correctly after the input is corrected.	Medium	Validation / Recovery	PASS
Validation messages should consistently appear in the currently selected language. No message should remain in an unrelated language.	High	Localization / E2E	FAILED
Password should not be unnecessarily exposed as readable text in the DOM/HTML or other client-side representation.	High	Security	FAILED

TC ID	Module	Test Scenario	Preconditions
HOME_001	Homepage	Verify Homepage loads successfully after login	User logged in successfully
HOME_002	Homepage	Verify all Homepage widgets are displayed correctly	User on Homepage
HOME_003	Homepage	Verify Homepage refresh behavior	User on Homepage
HOME_004	Homepage	Verify session persistence after refresh	User logged in
HOME_005	Homepage	Verify Homepage access in new browser tab	User logged in
HOME_006	Homepage	Verify unauthorized/Incognito Homepage access	User logged out

HOME_014	Homepage	Verify Homepage widgets remain visible after refresh	User on Homepage
HOME_015	Homepage	Verify Logout functionality from Homepage	User logged in
HOME_016	Homepage	Verify Homepage cannot be accessed after logout	User logged out

Test Steps	Test Data	Expected Result
Complete Login + MFA flow	Valid Credentials	Homepage should load successfully without errors
Observe Homepage screen	N/A	All widgets, shortcuts, icons, and user information should be displayed correctly
Refresh browser page	N/A	Homepage should reload successfully without logout
Refresh Homepage	N/A	User session should remain active after refresh
Open Homepage URL in a new tab	Homepage URL	Homepage should load successfully without requiring re-login
Enter Homepage URL directly in browser	Homepage URL	User should be redirected to Login page
Click browser Back button	N/A	User should not be able to move to Login/MFA screens after successful authentication
Click browser Forward button	N/A	Application should maintain valid navigation flow
Login and navigate through Homepage	Language Selection	Selected language should remain applied throughout Homepage
Resize browser window to different dimensions	N/A	Homepage layout should remain usable without overlapping UI elements
Observe user information section	Logged-in User	Correct user name and profile information should be displayed
Observe top navigation area	N/A	Search, Notifications, Files, Tasks, Timer, Calendar, Chat, Mail, Profile icons should be visible
Navigate to Homepage	N/A	Homepage should load within acceptable response time without visible lag
Refresh browser	N/A	Widgets should remain displayed correctly after refresh
Logout using profile menu	N/A	User should be redirected to Login page successfully
Attempt to access Homepage URL or use browser Back button	Homepage URL	User should not be able to access Homepage after logout

Preconditions	Test Steps
User is logged in and is on My Workspace page	1. Click New.2. Select New Folder.3. Enter folder name.4. Click Create.
User is logged in and is on My Workspace page	1. Click New.2. Select New Document.3. Enter document name.4. Click Create.
User is logged in and is on My Workspace page	1. Click New.2. Select New Spreadsheet.3. Enter spreadsheet name.4. Click Create.
User is logged in and is on My Workspace page	1. Click New.2. Select New Slide.3. Enter presentation name.4. Click Create.
User is logged in and is on My Workspace page	1. Click New.2. Select New PDF.3. Enter PDF name.4. Click Create.
User is logged in and is on My Workspace page	1. Click New.2. Select New Shortcut.3. Select target file/folder.4. Save.
User is on file creation dialog	1. Select any file type.2. Leave name field blank.3. Click Create.
File with same name already exists	1. Create a file.2. Attempt creating another file with identical name.
User is on file creation dialog	1. Enter invalid characters in file name.2. Click Create.
User is on file creation dialog	1. Enter a filename exceeding maximum length.2. Click Create.
File has been successfully created	1. Create file.2. Refresh browser.3. Navigate to workspace.
File exists in workspace	1. Locate file.2. Double-click/Open file.
Document created successfully	1. Open document.2. Add text.3. Save document.4. Reopen document.
Document open in editor	1. Insert image.2. Save.3. Refresh.4. Reopen.
Document open in editor	1. Insert table.2. Save.3. Reopen document.
Document open in editor	1. Insert page break.2. Save.3. Reopen document.
Document open in editor	1. Apply line spacing.2. Save.3. Reopen.
User is logged in and multiple files/folders exist in the workspace	1. Navigate to My Workspace.2. Select multiple files/folders using multi-select option.3. Click **Move to Trash/Delete**.4. Confirm the action if prompted.5. Open Trash folder.
Multiple files selected	1. Select multiple files.2. Click Move to Trash.

Multiple file types exist	1. Select document, spreadsheet, PDF, slide, and folder.2. Click Move to Trash.
User is in workspace	1. Click Move to Trash without selecting any file.
Files already moved to Trash	1. Open Trash.2. Locate deleted items.
Workspace contains many files	1. Select 50+ files/folders.2. Click Move to Trash.
User is logged in and folders exist	1. Navigate to Files module.2. Click the Tree View icon.3. Observe the left navigation panel.
Tree View is enabled	1. Open Tree View.2. Click expand arrow beside a folder.3. Observe child folders.
Expanded folder exists	1. Expand a folder.2. Click collapse arrow.
Multiple folders exist	1. Open Tree View.2. Select a folder.
Tree View enabled	1. Expand multiple folders.2. Open a subfolder.3. Return to previous folder.
User is on file listing page	1. Click Toggle Selection icon.2. Observe file cards.
Selection mode enabled	1. Enable Toggle Selection.2. Select a file checkbox.
Selection mode enabled	1. Enable Toggle Selection.2. Select multiple files/folders.
One or more items selected	1. Click selected checkbox again.
Selection mode enabled	1. Click Toggle Selection icon again.
Selection mode enabled and files selected	1. Select multiple files.2. Change view from Medium Icons to List/Cards view.
Selection mode enabled	1. Select multiple files.2. Observe action menu.
User is logged in and files/folders exist	1. Navigate to My Workspace.2. Select a file/folder.3. Click Add to Favorites.
At least one item is marked as favorite	1. Navigate to Favorites section.
Favorite item exists	1. Navigate to Favorites.2. Click a favorite item.
Multiple favorite items exist	1. Navigate to Favorites.2. Enter search keyword in search box.
Multiple favorite items exist	1. Navigate to Favorites.2. Select sorting option.

Favorite items exist	1. Navigate to Favorites.2. Change view type (Medium Icons/List/Cards if available).
Favorite item exists	1. Open Favorites.2. Remove favorite mark from item.
No items marked as favorite	1. Navigate to Favorites.
Favorite item exists	1. Mark item as favorite.2. Logout.3. Login again.4. Open Favorites.
Favorites list contains items	1. Add a favorite item.2. Remove a favorite item.3. Observe item count.

Test Data	Expected Result	Priority
Folder Name: TestFolder01	Folder is created successfully and displayed in the current workspace.	High
Document Name: TestDoc01	Document is created and opens in the document editor.	Critical
Spreadsheet Name: TestSheet01	Spreadsheet is created and opens successfully.	Critical
Slide Name: TestSlide01	Slide presentation is created and editor loads successfully.	High
PDF Name: TestPDF01	PDF file is created successfully.	High
Existing File/Folder	Shortcut is created and points to the selected item.	Medium
Blank Value	Validation message is displayed and file is not created.	High
Existing File Name	Appropriate validation message is displayed or duplicate naming rule is applied.	High
Test:/*?<>		System validates input and prevents invalid file names.
256+ Characters	Validation message is displayed and file is not created.	Medium
Any Valid File	File remains available after page refresh.	Critical
Existing File	Appropriate editor opens successfully.	Critical
Sample Text	Content persists after reopening.	Critical
JPG/PNG Image	Image persists after save and reload.	Critical
3x3 Table	Table structure remains intact.	High
N/A	Page break remains in correct position.	High
1.5 / 2.0 spacing	Line spacing remains unchanged.	High
3 Documents, 2 Folders	All selected items are removed from the current workspace and successfully moved to Trash. The number of items in Trash increases accordingly.	Critical
5 Files	Confirmation dialog/message is displayed before deletion.	High

Mixed File Types	All selected items are moved to Trash successfully.	High
N/A	Appropriate validation message is displayed and no action is performed.	Medium
Previously Deleted Files	All deleted items are available in Trash with correct names and metadata.	High
50+ Files	Operation completes successfully without errors or significant delay.	Medium
Existing folders	Folder hierarchy should be displayed in expandable tree structure.	High
Parent folder with subfolders	Child folders should expand and display correctly.	High
Existing folder	Folder hierarchy should collapse and hide child folders.	Medium
Existing folder	Files and folders belonging to selected folder should be displayed.	High
Existing folder structure	Previously expanded folders should remain expanded.	Medium
Existing files	Selection checkboxes should appear on all file/folder items.	High
Existing file	Selected file should be highlighted and marked as selected.	High
Multiple files	Multiple items should be selected simultaneously.	High
Selected file	Item should be deselected successfully.	Medium
Existing files	Selection mode should be disabled and checkboxes should disappear.	Medium
Selected files	Selected items should remain selected after view change.	Medium
Multiple files	Bulk actions (Move to Trash, Copy, Move, etc.) should become available.	High
Existing file/folder	Selected item should be added to Favorites successfully.	High
Favorite item	Added favorite item should be displayed in Favorites list.	High
Favorite file/folder	Selected item should open successfully.	High
Item name/tag	Matching favorite items should be displayed.	Medium
Multiple favorites	Items should be sorted based on favorited date.	Medium

Favorite items	Favorite items should be displayed correctly in selected view.	Medium
Favorite item	Item should be removed from Favorites list.	High
None	Appropriate empty-state message should be displayed.	Medium
Favorite item	Favorite item should remain available in Favorites.	High
Favorite items	Favorites item count should update dynamically.	Medium

TC_CHAT_007	Chatbot	Verify chatbot handles empty message submission	Chatbot panel is open
TC_CHAT_008	Chatbot	Verify chatbot handles long messages	Chatbot panel is open
TC_CHAT_009	Chatbot	Verify special characters in chat input	Chatbot panel is open
TC_CHAT_010	Chatbot	Verify conversation history remains visible during session	Existing conversation available
TC_CHAT_011	Chatbot	Verify prompt/template selection field functionality	Chatbot panel is open
TC_CHAT_012	Chatbot	Verify '+' button functionality	Chatbot panel is open
TC_CHAT_013	Chatbot	Verify timer/history icon functionality	Chatbot panel is open
TC_CHAT_014	Chatbot	Verify attachment icon functionality	Chatbot panel is open
TC_CHAT_015	Chatbot	Verify multiple chat messages exchange	Chatbot panel is open
TC_CHAT_016	Chatbot	Verify chatbot scroll behavior for long conversations	Long chat history exists
TC_CHAT_017	Chatbot	Verify chatbot loading indicator during response generation	Chatbot processing a request
TC_CHAT_018	Chatbot	Verify chatbot accessibility after page refresh	Active chatbot session exists
TC_CHAT_019	Chatbot	Verify chatbot behavior when network is unavailable	User logged in
TC_CHAT_020	Chatbot	Verify chatbot input placeholder text	Chatbot panel is open

TC_CHAT_021	Email	Verify AI can search emails from last week	User mailbox connected
TC_CHAT_022	Email	Verify AI can draft an email	User mailbox connected
TC_CHAT_023	Email	Verify approval is required before sending email	User mailbox connected
TC_CHAT_024	Email	Verify AI can summarize unread emails	User mailbox connected
TC_CHAT_025	Email	Verify AI can mark an email as read	Unread email exists
TC_CHAT_026	Calendar	Verify AI can schedule a meeting	Calendar connected
TC_CHAT_027	Calendar	Verify AI can list weekly meetings	Calendar connected
TC_CHAT_028	Calendar	Verify AI can cancel a meeting	Existing meeting available
TC_CHAT_029	Calendar	Verify AI can check availability	Calendar connected
TC_CHAT_030	Calendar	Verify AI can book an Appointly slot	Appointly integrated
TC_CHAT_031	Files	Verify AI can list files in current folder	Files available
TC_CHAT_032	Files	Verify AI can generate Excel report	Data source available
TC_CHAT_033	Files	Verify AI can share a file	File exists
TC_CHAT_034	Files	Verify AI can search files	Files exist
TC_CHAT_035	Files	Verify AI can upload document from URL	Valid URL available
TC_CHAT_036	HR	Verify AI can retrieve leave balance	HR integration configured
TC_CHAT_037	HR	Verify AI can submit leave request	HR integration configured

TC_CHAT_038	HR	Verify AI can find employee details	HR records available
TC_CHAT_039	HR	Verify AI can display organization structure	HR integration configured
TC_CHAT_040	HR	Verify AI can list recently hired employees	HR records available
TC_CHAT_041	Tasks & Projects	Verify AI can create a task	Project board exists
TC_CHAT_042	Tasks & Projects	Verify AI can list assigned tasks	Tasks assigned
TC_CHAT_043	Tasks & Projects	Verify AI can move task status	Existing task available
TC_CHAT_044	Tasks & Projects	Verify AI can add comment to task	Existing task available
TC_CHAT_045	Tasks & Projects	Verify AI can start task timer	Existing task assigned
TC_CHAT_046	Accounting	Verify AI can list unpaid invoices	Accounting integration configured
TC_CHAT_047	Accounting	Verify AI can retrieve monthly P&L	Accounting integration configured
TC_CHAT_048	Accounting	Verify AI can search supplier invoice	Supplier invoices exist
TC_CHAT_049	Accounting	Verify AI can show YTD revenue	Accounting integration configured
TC_CHAT_050	Sales & CRM	Verify AI can list open deals	CRM integration configured
TC_CHAT_051	Sales & CRM	Verify AI can search customer records	CRM records available
TC_CHAT_052	Sales & CRM	Verify AI can retrieve campaign statistics	CRM integration configured
TC_CHAT_053	Sales & CRM	Verify AI can display product leaderboard	Product performance data available
TC_CHAT_054	Knowledge Base	Verify AI can search uploaded documents	KB configured
TC_CHAT_055	Knowledge Base	Verify AI can summarize uploaded document	Document uploaded

TC_CHAT_056	Knowledge Base	Verify AI can list document collections	KB configured
TC_CHAT_057	Web & Research	Verify AI can perform web search	Internet access available
TC_CHAT_058	Web & Research	Verify AI can retrieve company information	Internet access available
TC_CHAT_059	Web & Research	Verify AI can search LinkedIn profile	Enrichment tools configured
TC_CHAT_060	Charts & Visualization	Verify AI can generate bar chart	Sales data available
TC_CHAT_061	Charts & Visualization	Verify AI can generate pie chart	Invoice data available
TC_CHAT_062	Time Tracking	Verify AI can retrieve logged hours	Timesheet data available
TC_CHAT_063	Time Tracking	Verify AI can suggest task timers	Tasks assigned
TC_CHAT_064	Time Tracking	Verify AI can show compliance violations	Team time tracking configured

Test Steps	Test Data	Expected Result	Priority
1. Click chatbot icon at bottom-right corner	N/A	Chatbot panel opens without errors	High
1. Click Close (X) icon	N/A	Chatbot panel closes successfully	Medium
1. Click Minimize icon	N/A	Chatbot minimizes and remains accessible	Medium
1. Click Expand icon	N/A	Chatbot opens in expanded view	Medium
1. Enter message 2. Click Send	"Hi"	Message is sent and chatbot responds appropriately	High
1. Enter scheduling request 2. Send message	"Can you help me schedule a meeting?"	Chatbot requests meeting details (title, date/time, etc.)	High
1. Leave input field empty 2. Click Send	Empty input	Message is not sent and validation is displayed (if applicable)	Medium
1. Enter lengthy text 2. Send message	1000+ character message	Chatbot processes message without UI issues	Medium
1. Enter special characters 2. Send	`!@#$%^&*()_+`	Chatbot handles special characters without errors	Medium
1. Send multiple messages	Various messages	Previous messages remain visible in chat window	Medium
1. Click prompt field 2. Select a prompt	Available prompt template	Selected prompt is inserted into chat input	Medium
1. Click '+' icon	N/A	Additional chatbot options/actions are displayed	Medium
1. Click timer/history icon	N/A	Chat history or scheduled conversations are displayed	Medium
1. Click attachment icon 2. Select file	Valid file	File is attached/uploaded successfully	High
1. Send multiple queries sequentially	Multiple questions	Chatbot maintains conversation context and responds correctly	High
1. Send multiple messages	Multiple messages	Scroll bar appears and allows navigation through chat history	Medium
1. Send message	Any valid query	Loading/typing indicator is displayed until response is received	Medium
1. Refresh page 2. Open chatbot	N/A	Chatbot loads successfully without UI issues	Medium
1. Disconnect network 2. Send message	Valid query	Appropriate error message is displayed	High
1. Observe input field	N/A	Placeholder text ("Ask away!..." etc.) is displayed correctly	Low

Ask AI to search invoice emails from last week	"Search my emails about invoice from last week"	Matching email threads are returned based on filters	High
Ask AI to draft an email	"Draft an email to John about Q3 report"	Email draft is generated with recipient, subject, and body	High
Ask AI to send an email	"Send email to sarah@acme.com"	Approval prompt is displayed before sending	Critical
Ask AI to read unread emails	"Read my latest unread emails"	Unread emails are fetched and summarized	High
Ask AI to mark email as read	"Mark this email as read"	Email status changes to read	Medium
Ask AI to schedule meeting	"Schedule a meeting with John tomorrow at 3pm"	Calendar event is created after availability check	Critical
Ask AI for weekly meetings	"What meetings do I have this week?"	Meetings for current week are displayed	High
Ask AI to cancel meeting	"Cancel my meeting on Wednesday"	Meeting is identified and approval requested before cancellation	High
Ask AI availability query	"Check if I'm free on Monday at 10am"	Availability status is displayed	Medium
Ask AI to book appointment	"Book an Appointly slot with Anna"	Available slots displayed and booking completed	High
Ask AI to list files	"List files in this folder"	Folder contents are displayed	High
Ask AI to generate report	"Generate an Excel report of employee data"	Downloadable Excel file is generated	High
Ask AI to share file	"Share this file with John"	File permissions assigned and sharing completed	High
Ask AI to search contracts	"Search for contract files"	Matching files are returned	Medium
Ask AI to upload file	"Upload a document from URL"	File is downloaded and uploaded successfully	High
Ask AI leave balance	"How many vacation days do I have left?"	Leave balance is displayed	High
Ask AI to request leave	"Submit a leave request for 3 days"	Leave request is submitted after approval	High

Ask AI employee details	"Find employee Sarah's contact details"	Employee contact information is displayed	Medium
Ask AI organization hierarchy	"Show me the org structure"	Organizational hierarchy is displayed	Medium
Ask AI recent hires	"Who was hired this month?"	Employees hired during current month are listed	Medium
Ask AI to create task	"Create a task called Review Report in the dev board"	Task is created successfully	High
Ask AI assigned tasks	"What tasks are assigned to me?"	Assigned tasks are displayed	Medium
Ask AI to update task	"Move task X to Done"	Task status changes to Done	High
Ask AI to comment	"Add a comment on task Y"	Comment is added successfully	Medium
Ask AI to start timer	"Start a timer on my current task"	Timer starts successfully	Medium
Ask AI unpaid invoices	"Show me unpaid invoices"	Unpaid invoices are displayed	High
Ask AI P&L report	"What's the P&L for this month?"	Monthly P&L report is displayed	High
Ask AI invoice search	"Find supplier invoice from TechCorp"	Matching supplier invoice is displayed	Medium
Ask AI revenue report	"Show revenue YTD"	Year-to-date revenue is displayed	Medium
Ask AI open deals	"Show me my open deals"	Active deals are displayed	High
Ask AI customer search	"Search for customer Acme Corp"	Customer record is displayed	Medium
Ask AI campaign performance	"What's the campaign performance for Q3?"	Campaign statistics are displayed	Medium
Ask AI leaderboard	"Get product leaderboard"	Product rankings are displayed	Medium
Ask AI NDA search	"Search my documents for NDA terms"	Relevant document sections are returned	High
Ask AI document summary	"Summarize the contract I uploaded"	Document summary is generated	High

Ask AI collection list	"List all my document collections"	Collection list is displayed	Medium
Ask AI latest AI trends	"Search the web for latest AI trends"	Search results with references are returned	High
Ask AI company research	"Look up company info for Google"	Company information is returned	Medium
Ask AI LinkedIn search	"Find LinkedIn profile of Elon Musk"	LinkedIn profile information is returned	Medium
Ask AI chart generation	"Show a bar chart of my team's sales by month"	Bar chart is generated successfully	High
Ask AI pie chart	"Visualize invoice data as a pie chart"	Pie/Donut chart is rendered	High
Ask AI hours logged	"What hours did I log this week?"	Weekly timesheet summary is displayed	Medium
Ask AI timer suggestion	"Suggest timers for my tasks today"	AI-generated timer recommendations are displayed	Medium
Ask AI compliance report	"Show compliance violations for my team"	Compliance violations are displayed	Medium

TC ID	Module	Test Scenario	Preconditions
TC-TKT-001	Tickets	Verify Tickets button opens Submit Request panel	User is logged in on dashboard
TC-TKT-002	Tickets	Verify all fields and controls render correctly	Submit Request panel is open
TC-TKT-003	Tickets	Verify switching between Clusterix and General tabs	Submit Request panel is open
TC-TKT-004	Tickets	Verify default selected tab on panel open	Submit Request panel opened
TC-TKT-005	Tickets	Verify Support Subject dropdown options	Submit Request panel is open
TC-TKT-006	Tickets	Verify Support Subject selection	Dropdown available
TC-TKT-007	Tickets	Verify Urgency dropdown options and selection	Submit Request panel is open
TC-TKT-008	Tickets	Verify valid title entry	Submit Request panel is open
TC-TKT-009	Tickets	Verify title field boundary validation	Submit Request panel is open
TC-TKT-010	Tickets	Verify message/description entry	Submit Request panel is open
TC-TKT-011	Tickets	Verify Polish feature rewrites message	Message field contains text
TC-TKT-012	Tickets	Verify Polish with empty message	Message field is empty
TC-TKT-013	Tickets	Verify screenshot attachment functionality	Permission granted
TC-TKT-014	Tickets	Verify screen recording attachment functionality	Permission granted
TC-TKT-015	Tickets	Verify file upload using click or drag-and-drop	Submit Request panel is open
TC-TKT-016	Tickets	Verify unsupported or oversized file upload validation	Submit Request panel is open
TC-TKT-017	Tickets	Verify multiple file attachments and removal	Submit Request panel is open

TC-TKT-018	Tickets	Verify submit with all mandatory fields empty	Submit Request panel is open
TC-TKT-019	Tickets	Verify submit with partially completed form	Submit Request panel is open
TC-TKT-020	Tickets	Verify successful request submission	Submit Request panel is open
TC-TKT-021	Tickets	Verify duplicate submission prevention	Valid request ready
TC-TKT-022	Tickets	Verify Cancel functionality	Form contains unsaved data
TC-TKT-023	Tickets	Verify Back button functionality	Submit Request panel is open
TC-TKT-024	Tickets	Verify Close icon functionality	Submit Request panel is open
TC-TKT-025	Tickets	Verify role-based access to Submit Request	Multiple user roles available
TC-TKT-026	Tickets	Verify behavior during submit API failure	Backend error simulated
TC-TKT-027	Tickets	Verify panel responsiveness on different screen sizes	Application accessible on multiple devices
TC-TKT-028	Tickets	Verify keyboard and screen-reader accessibility	Accessibility tools available

Test Steps	Test Data	Expected Result
1. Login to Clusterix.2. Click Tickets/Support button.3. Select Submit Request.	Valid user	Submit Request panel opens with all fields and controls displayed.
1. Open Submit Request panel.2. Verify labels, fields, tabs, buttons and layout.	N/A	All UI elements display correctly without overlap or alignment issues.
1. Click Clusterix tab.2. Click General tab.3. Observe changes.	N/A	Selected tab is highlighted and corresponding content is loaded.
1. Open Submit Request panel.2. Observe active tab.	N/A	Correct default tab is selected per design.
1. Click Support Subject dropdown.2. Review available options.	N/A	Dropdown displays all available subjects and allows selection.
1. Open Support Subject dropdown.2. Select a value.	Valid subject	Selected value is retained and displayed.
1. Open Urgency dropdown.2. Select urgency level.	Low/Medium/High	Selected urgency value is displayed correctly.
1. Enter title in Title field.	Unable to open report	Title is accepted and displayed correctly.
1. Enter long text.2. Enter special characters and emojis.	256+ chars, !@#$%, emoji	Field handles input gracefully and enforces limits.
1. Enter text in Message field.	Sample issue description	Multi-line text is accepted and displayed correctly.
1. Enter rough message.2. Click Polish.	Text with typos	Message is improved while preserving intent.
1. Click Polish button.	Empty message	User receives validation or Polish remains disabled.
1. Click Screenshot.2. Capture screen.3. Attach screenshot.	N/A	Screenshot is attached successfully and visible.
1. Click Screen Record.2. Record short video.3. Stop recording.	N/A	Recording is attached successfully.
1. Upload file using click or drag-drop.	PNG/JPG/PDF	File uploads successfully and displays attachment details.
1. Upload unsupported file.2. Upload oversized file.	EXE, oversized file	Upload is blocked with appropriate error message.
1. Upload multiple files.2. Remove one attachment.	Multiple valid files	Selected attachment is removed while others remain.

1. Leave form blank.2. Click Submit Request.	Empty form	Submission is blocked and required field validation appears.
1. Fill only Title field.2. Click Submit.	Partial data	Submission is blocked and missing fields are highlighted.
1. Complete mandatory fields.2. Submit request.	Valid request data	Request is submitted successfully and confirmation displayed.
1. Double-click Submit button rapidly.	Valid request	Only one ticket is created.
1. Enter data.2. Click Cancel.	Partial form data	Form closes and request is not created.
1. Click Back button.	N/A	User is returned to previous screen without submitting.
1. Click Close (X) icon.	N/A	Panel closes successfully.
1. Login with different roles.2. Access Submit Request.	Different user roles	Access is granted or denied based on permissions.
1. Complete form.2. Trigger API failure.3. Submit request.	Server error / timeout	Error message displayed and entered data retained.
1. Open panel on desktop, tablet, mobile.2. Verify layout.	Multiple resolutions	Layout remains usable and scrolls correctly.
1. Navigate form using keyboard.2. Use screen reader.	Keyboard, screen reader	All controls are accessible and properly labeled.

TC ID	Module	Test Scenario
TC-TSK-001	Tasks & Projects	Verify task creation with valid details
TC-TSK-002	Tasks & Projects	Verify task creation without mandatory title
TC-TSK-003	Tasks & Projects	Verify task assignment to a valid user
TC-TSK-004	Tasks & Projects	Verify task status change via drag and drop
TC-TSK-005	Tasks & Projects	Verify past due date validation
TC-TSK-006	Tasks & Projects	Verify subtask creation
TC-TSK-007	Tasks & Projects	Verify adding comments and attachments
TC-TSK-008	Tasks & Projects	Verify oversized attachment upload validation
TC-TSK-009	Tasks & Projects	Verify task filtering and search functionality
TC-TSK-010	Tasks & Projects	Verify access restriction for unauthorized users
TC-TSK-011	Tasks & Projects	Verify task deletion
TC-TSK-012	Tasks & Projects	Verify concurrent task editing by multiple users

TC ID	Module	Test Scenario
TC-TIME-001	Time Tracking	Verify user can start a timer on a task
TC-TIME-002	Time Tracking	Verify user can stop a running timer
TC-TIME-003	Time Tracking	Verify only one active timer can run at a time
TC-TIME-004	Time Tracking	Verify manual time entry creation
TC-TIME-005	Time Tracking	Verify validation for invalid time range
TC-TIME-006	Time Tracking	Verify existing time entry can be edited

TC-TIME-007	Time Tracking	Verify editing is blocked for locked periods
TC-TIME-008	Time Tracking	Verify timesheet displays weekly entries correctly
TC-TIME-009	Time Tracking	Verify statistics/report calculations
TC-TIME-010	Time Tracking	Verify future-dated time entry validation

TC ID	Module	Test Scenario
TC-CAL-001	Calendar	Verify event creation with valid details
TC-CAL-002	Calendar	Verify validation when creating event without title
TC-CAL-003	Calendar	Verify validation when end time is earlier than start time
TC-CAL-004	Calendar	Verify guest invitation functionality
TC-CAL-005	Calendar	Verify recurring event creation
TC-CAL-006	Calendar	Verify editing a single occurrence in recurring series
TC-CAL-007	Calendar	Verify rescheduling event using drag and drop
TC-CAL-008	Calendar	Verify handling of overlapping events
TC-CAL-009	Calendar	Verify reminder functionality
TC-CAL-010	Calendar	Verify time-zone conversion for attendees
TC-CAL-011	Calendar	Verify editing restrictions for past events

TC ID	Module	Test Scenario
TC-FILE-001	File Management	Verify file upload with valid file
TC-FILE-002	File Management	Verify oversized file upload validation
TC-FILE-003	File Management	Verify unsupported file type upload validation

TC-FILE-004	File Management	Verify folder creation
TC-FILE-005	File Management	Verify duplicate folder name handling
TC-FILE-006	File Management	Verify file rename functionality
TC-FILE-007	File Management	Verify file move functionality
TC-FILE-008	File Management	Verify file copy functionality
TC-FILE-009	File Management	Verify file download functionality
TC-FILE-010	File Management	Verify file preview functionality
TC-FILE-011	File Management	Verify file delete and restore functionality
TC-FILE-012	File Management	Verify share link generation
TC-FILE-013	File Management	Verify restricted file access
TC-FILE-014	File Management	Verify file search functionality

TC ID	Module	Test Scenario
TC-DOC-001	Documents	Verify document creation and auto-save functionality
TC-DOC-002	Documents	Verify text formatting functionality
TC-DOC-003	Documents	Verify image and table insertion
TC-DOC-004	Documents	Verify real-time collaboration between multiple users
TC-DOC-005	Documents	Verify version history and restore functionality
TC-DOC-006	Documents	Verify document export functionality
TC-DOC-007	Documents	Verify import of complex DOCX document
TC-DOC-008	Documents	Verify comment creation on selected content

TC-DOC-009	Documents	Verify conflict handling during offline editing
TC-DOC-010	Documents	Verify editing restrictions for view-only users

TC ID	Module	Test Scenario
TC-SHEET-001	Spreadsheets	Verify spreadsheet creation and data entry
TC-SHEET-002	Spreadsheets	Verify formula calculation functionality
TC-SHEET-003	Spreadsheets	Verify invalid formula handling
TC-SHEET-004	Spreadsheets	Verify divide-by-zero formula handling
TC-SHEET-005	Spreadsheets	Verify cross-sheet references
TC-SHEET-006	Spreadsheets	Verify sorting and filtering functionality
TC-SHEET-007	Spreadsheets	Verify chart generation from spreadsheet data
TC-SHEET-008	Spreadsheets	Verify XLSX/CSV import functionality
TC-SHEET-009	Spreadsheets	Verify large file import handling
TC-SHEET-010	Spreadsheets	Verify spreadsheet export functionality
TC-SHEET-011	Spreadsheets	Verify freeze panes functionality

TC ID	Module	Test Scenario
TC-PRES-001	Presentations	Verify presentation creation
TC-PRES-002	Presentations	Verify adding content to a slide
TC-PRES-003	Presentations	Verify slide reordering functionality
TC-PRES-004	Presentations	Verify slide transition functionality
TC-PRES-005	Presentations	Verify presentation mode navigation
TC-PRES-006	Presentations	Verify presentation export functionality

TC-PRES-007	Presentations	Verify complex PPTX import functionality
TC-PRES-008	Presentations	Verify handling of large media files
TC-PRES-009	Presentations	Verify real-time collaboration on presentation
TC-PRES-010	Presentations	Verify editing restrictions for view-only users

TC ID	Module	Test Scenario
TC-PDF-001	PDF Management	Verify PDF file can be opened and viewed
TC-PDF-002	PDF Management	Verify PDF annotation functionality
TC-PDF-003	PDF Management	Verify PDF form filling functionality
TC-PDF-004	PDF Management	Verify PDF signature functionality
TC-PDF-005	PDF Management	Verify PDF merge functionality
TC-PDF-006	PDF Management	Verify PDF split functionality
TC-PDF-007	PDF Management	Verify text search within PDF
TC-PDF-008	PDF Management	Verify search behavior on scanned PDF without OCR
TC-PDF-009	PDF Management	Verify encrypted PDF access control
TC-PDF-010	PDF Management	Verify corrupted PDF handling
TC-PDF-011	PDF Management	Verify PDF download with annotations preserved

TC ID	Module	Test Scenario
TC-MTG-001	Meetings	Verify user can start a new meeting
TC-MTG-002	Meetings	Verify user can join a meeting using a valid link
TC-MTG-003	Meetings	Verify invalid or expired meeting link handling
TC-MTG-004	Meetings	Verify microphone mute and unmute functionality

TC-MTG-005	Meetings	Verify camera toggle functionality
TC-MTG-006	Meetings	Verify screen sharing functionality
TC-MTG-007	Meetings	Verify behavior when camera/microphone permissions are denied
TC-MTG-008	Meetings	Verify in-meeting chat functionality
TC-MTG-009	Meetings	Verify meeting recording functionality
TC-MTG-010	Meetings	Verify meeting performance under low bandwidth conditions
TC-MTG-011	Meetings	Verify participant limit enforcement

TC ID	Module	Test Scenario
TC-CHAT-001	Chat & Messaging	Verify sending a 1:1 message
TC-CHAT-002	Chat & Messaging	Verify empty message cannot be sent
TC-CHAT-003	Chat & Messaging	Verify group chat messaging
TC-CHAT-004	Chat & Messaging	Verify file sharing in chat
TC-CHAT-005	Chat & Messaging	Verify oversized attachment validation
TC-CHAT-006	Chat & Messaging	Verify emoji reactions on messages
TC-CHAT-007	Chat & Messaging	Verify read receipt functionality
TC-CHAT-008	Chat & Messaging	Verify chat history search
TC-CHAT-009	Chat & Messaging	Verify message sending while offline
TC-CHAT-010	Chat & Messaging	Verify message notification functionality

TC ID	Module	Test Scenario
TC-MAIL-001	Email	Verify email account connection with valid credentials

TC-MAIL-002	Email	Verify email account connection with invalid credentials
TC-MAIL-003	Email	Verify compose and send email functionality
TC-MAIL-004	Email	Verify invalid recipient email validation
TC-MAIL-005	Email	Verify sending email with attachment
TC-MAIL-006	Email	Verify oversized attachment validation
TC-MAIL-007	Email	Verify reply and forward email functionality
TC-MAIL-008	Email	Verify email search functionality
TC-MAIL-009	Email	Verify draft save and scheduled send functionality
TC-MAIL-010	Email	Verify moving emails to folders or labels
TC-MAIL-011	Email	Verify signature and template application
TC-MAIL-012	Email	Verify compliance rule enforcement during send
TC-MAIL-013	Email	Verify behavior when mail provider is unavailable

Preconditions	Test Steps	Test Data
User is logged in and has board access	1. Open board.2. Click New Task.3. Enter title, assignee, due date.4. Click Save.	Title = "Prepare report", Assignee = Anna, Due Date = Tomorrow
User is logged in	1. Open New Task.2. Leave Title field empty.3. Click Save.	Empty Title
Existing task available	1. Open task.2. Assign task to a user.3. Save changes.	Assignee = Valid User
Task exists in Kanban board	1. Drag task from "To Do" column.2. Drop into "Done" column.	N/A
Existing task available	1. Open task.2. Set due date to a past date.3. Save changes.	Due Date = Yesterday
Existing task available	1. Open task.2. Click Add Subtask.3. Enter subtask details.4. Save.	Subtask = "Draft intro"
Existing task available	1. Open task.2. Add comment.3. Attach file.4. Save.	Comment text, File = notes.pdf
Existing task available	1. Open task.2. Attempt to upload oversized file.	File size exceeds configured limit
Multiple tasks exist	1. Apply filters by assignee/status.2. Search using keyword.	Keyword = "report"
User is not a member of the board	1. Attempt to access a board without permissions.	N/A
Existing task available	1. Open task.2. Click Delete.3. Confirm deletion.	N/A
Two users have access to the same task	1. Open same task in two sessions.2. Edit same field.3. Save changes from both sessions.	N/A
Preconditions	**Test Steps**	**Test Data**
User is logged in and a task is selected	1. Open a task.2. Click Start Timer.	N/A
Timer is currently running	1. Click Stop Timer.	N/A
One timer is already running	1. Start a timer on Task A.2. Attempt to start a timer on Task B.	N/A
User is logged in	1. Open Time Tracking.2. Add manual time entry.3. Enter start and end time.4. Save.	Start = 09:00, End = 10:30
User is logged in	1. Create manual entry.2. Enter end time earlier than start time.3. Save.	Start = 10:30, End = 09:00
Time entry exists and period is unlocked	1. Open existing entry.2. Modify duration or description.3. Save changes.	Updated duration/description

Time entry exists in locked period	1. Open entry from locked period.2. Attempt to edit.3. Save changes.	N/A
Time entries exist	1. Open weekly timesheet view.	Existing time entries
Time entries exist	1. Open statistics/report section.2. Select date range.	Last 7 days
User is logged in	1. Create time entry for future date.2. Save entry.	Date = Next Week

Preconditions	Test Steps	Test Data
User is logged in	1. Click New Event.2. Enter title, start time, end time, and guests.3. Click Save.	Title = "Sync", Time = 10:00–10:30
User is logged in	1. Click New Event.2. Leave title empty.3. Click Save.	Empty Title
User is logged in	1. Create a new event.2. Set end time earlier than start time.3. Click Save.	Start = 10:30, End = 10:00
Existing event or new event creation	1. Create/Edit event.2. Add guest.3. Send invitation.	Guest = colleague
User is logged in	1. Create new event.2. Configure recurrence pattern.3. Save event.	Weekly recurrence × 4
Recurring event series exists	1. Open one occurrence.2. Edit event details.3. Save changes for single occurrence.	N/A
Existing calendar event available	1. Drag event to a different time slot.2. Release event.	N/A
Existing event already scheduled	1. Create another event during same time slot.2. Save event.	Same time slot
Existing event available	1. Open event.2. Configure reminder.3. Save changes.	Reminder = 10 minutes before
Event includes attendees from different time zones	1. Create event.2. View event from another time zone account.	Different user timezone
Past event exists	1. Open a past event.2. Attempt to edit details.3. Save changes.	N/A

Preconditions	Test Steps	Test Data
User is logged in and target folder is open	1. Open folder.2. Click Upload.3. Select valid file.4. Complete upload.	report.pdf (supported type and size)
Target folder is open	1. Click Upload.2. Select file exceeding size limit.3. Upload file.	File size > maximum limit
Target folder is open	1. Click Upload.2. Select unsupported file type.3. Upload file.	file.exe

User is logged in	1. Click New Folder.2. Enter folder name.3. Save.	Reports
Folder with same name already exists	1. Click New Folder.2. Enter existing folder name.3. Save.	Reports
Existing file available	1. Select file.2. Click Rename.3. Enter new name.4. Save.	New file name
File and destination folder exist	1. Select file.2. Click Move.3. Select destination folder.4. Confirm.	Destination folder
File and destination folder exist	1. Select file.2. Click Copy.3. Select destination folder.4. Confirm.	Destination folder
Existing file available	1. Select file.2. Click Download.	Any valid file
Previewable file exists	1. Select file.2. Click Preview/Open.	PDF/Image file
Existing file available	1. Delete file.2. Open Trash/Recycle Bin.3. Restore file.	Any valid file
Existing file available	1. Select file.2. Click Share.3. Generate share link.	Any valid file
User lacks file permissions	1. Open restricted file/link.	Restricted file
Multiple files exist	1. Enter file name in search box.2. Execute search.	report
Preconditions	**Test Steps**	**Test Data**
User is logged in	1. Click New Document.2. Enter content.3. Wait for auto-save to trigger.	"Hello"
Document is open	1. Select text.2. Apply Bold, Heading, and List formatting.3. Save/Refresh document.	N/A
Document is open	1. Insert image.2. Insert table.3. Save document.	Valid image file
Document is shared with another user	1. Open same document in two user sessions.2. Both users edit simultaneously.	N/A
Document has multiple saved versions	1. Open Version History.2. Select previous version.3. Restore version.	N/A
Document is open	1. Click Export.2. Select PDF or DOCX format.3. Download file.	PDF, DOCX
User is logged in	1. Click Import.2. Select complex DOCX file.3. Complete import process.	complex.docx
Document is open	1. Select text.2. Add comment.3. Save comment.	Sample comment text

User temporarily loses internet connection	1. Open document.2. Disconnect network.3. Make edits.4. Reconnect network.	N/A
Document is shared with view-only permission	1. Open document as view-only user.2. Attempt to edit content.	N/A
Preconditions	**Test Steps**	**Test Data**
User is logged in	1. Create a new spreadsheet.2. Enter data into cells.3. Save or allow auto-save.	Numbers and text values
Spreadsheet contains data	1. Enter values in A1:A5.2. Enter formula in another cell.	=SUM(A1:A5), Values 1–5
Spreadsheet is open	1. Enter malformed formula in a cell.	=SUM(A1:
Spreadsheet is open	1. Enter divide-by-zero formula.	#VALUE!
Spreadsheet is open	1. Create second sheet.2. Reference data from another sheet.	Cross-sheet formula reference
Spreadsheet contains data range	1. Select data range.2. Apply sort ascending.3. Apply filter.	Sample tabular data
Spreadsheet contains data range	1. Select data range.2. Insert chart.	Sample numerical dataset
User is logged in	1. Click Import.2. Select spreadsheet file.3. Complete import.	data.xlsx / data.csv
User is logged in	1. Import a spreadsheet exceeding row/cell limits.	huge.csv
Spreadsheet contains data	1. Click Export.2. Select XLSX or CSV format.3. Download file.	XLSX / CSV
Spreadsheet contains multiple rows	1. Freeze top row.2. Scroll vertically through data.	N/A
Preconditions	**Test Steps**	**Test Data**
User is logged in	1. Create a new presentation.2. Add a slide.3. Save presentation.	N/A
Presentation and slide are open	1. Add text box.2. Insert image.3. Add shape to slide.	Valid image file
Presentation contains multiple slides	1. Drag a slide to a different position.2. Release the slide.	N/A
Presentation contains multiple slides	1. Select a slide.2. Apply transition effect.3. Enter presentation mode.	Fade transition
Presentation contains multiple slides	1. Start presentation mode.2. Navigate through slides using controls/keyboard.	N/A
Presentation is open	1. Click Export.2. Select PPTX or PDF format.3. Download file.	PPTX / PDF

User is logged in	1. Click Import.2. Select presentation file.3. Complete import process.	complex.pptx
Presentation slide is open	1. Insert large image or video file into slide.	Large image/video file
Presentation is shared with another user	1. Open presentation in two user sessions.2. Edit different slides simultaneously.	N/A
Presentation shared with view-only permission	1. Open presentation as view-only user.2. Attempt to edit content.	N/A

Preconditions	Test Steps	Test Data
User is logged in and PDF file exists	1. Open a PDF file.2. Navigate through pages.	valid.pdf
PDF is open	1. Select text.2. Add highlight or note annotation.3. Save changes.	N/A
Fillable PDF is open	1. Enter values into form fields.2. Save document.	Sample form data
PDF is open	1. Add digital/signature field.2. Apply signature.3. Save document.	Valid signature
Multiple PDF files available	1. Select two or more PDFs.2. Merge files.3. Save output.	Multiple PDF files
Multi-page PDF exists	1. Open PDF.2. Select pages to split.3. Save output files.	Multi-page PDF
Searchable PDF is open	1. Enter search keyword.2. Execute search.	invoice
Scanned PDF without OCR text layer	1. Open scanned PDF.2. Search for text.	Any keyword
Password-protected PDF exists	1. Attempt to open encrypted PDF without password.	Protected PDF
Corrupted PDF file available	1. Open corrupted PDF file.	broken.pdf
Annotated PDF is open	1. Download PDF file.2. Open downloaded file.	Annotated PDF

Preconditions	Test Steps	Test Data
User is logged in and camera/microphone permissions are granted	1. Click Start Meeting.2. Allow device permissions if prompted.	N/A
Meeting exists and user is logged in	1. Open meeting link or join from calendar invite.	Valid meeting link
User is logged in	1. Open an expired or invalid meeting link.	Invalid/expired link
User is in an active meeting	1. Click Mute.2. Click Unmute.	N/A

User is in an active meeting	1. Turn camera off.2. Turn camera on.	N/A
User is in an active meeting	1. Click Share Screen.2. Select screen/window.3. Start sharing.	N/A
Browser camera/microphone permissions are blocked	1. Start or join a meeting.2. Deny permissions when prompted.	N/A
User is in an active meeting	1. Open meeting chat.2. Send a message.	"hi"
User is meeting host and has recording permissions	1. Start recording.2. Stop recording.3. Access recording.	N/A
User has limited network connectivity	1. Join meeting using poor network connection.2. Participate in meeting.	Weak network
Meeting has reached maximum participant capacity	1. Attempt to join meeting after capacity is reached.	N/A

Preconditions	**Test Steps**	**Test Data**
User is logged in and contact exists	1. Open chat with a contact.2. Enter message.3. Click Send.	"Hello"
Chat window is open	1. Leave message field empty.2. Click Send.	Empty message
User is a member of a group chat	1. Open group chat.2. Enter message.3. Click Send.	Sample message
Chat window is open	1. Click Attach File.2. Select file.3. Send message.	doc.pdf
Chat window is open	1. Attach file exceeding size limit.2. Attempt to send.	Oversized file
Existing message available in chat	1. Select a message.2. Add emoji reaction.	Any emoji
Message has been sent to another user	1. Send message.2. Recipient opens chat and views message.	Sample message
Existing chat messages available	1. Open chat search.2. Enter keyword.3. Execute search.	"report"
Network connection is unavailable	1. Disconnect internet.2. Send message.3. Reconnect internet.	Sample message
Application is running in background	1. Receive new message while app is minimized/backgrounded.	Sample incoming message

Preconditions	**Test Steps**	**Test Data**
Valid email account credentials available	1. Navigate to Email Settings.2. Add email account.3. Enter valid IMAP/SMTP credentials.4. Save configuration.	Valid credentials

User is logged in	1. Add email account.2. Enter incorrect credentials.3. Save configuration.	Invalid credentials
Email account is connected	1. Click New Email.2. Enter recipient, subject, and body.3. Click Send.	Valid recipient email
Email account is connected	1. Compose email.2. Enter invalid email address.3. Click Send.	abc@
Compose window is open	1. Attach a file.2. Complete email details.3. Click Send.	file.pdf
Compose window is open	1. Attach file exceeding size limit.2. Attempt to send email.	Oversized file
Email exists in inbox	1. Open email.2. Click Reply and send response.3. Click Forward and send email.	Existing email
Inbox contains emails	1. Enter keyword in search field.2. Execute search.	invoice
Compose window is open	1. Create email draft.2. Save as draft.3. Schedule send for future time.	Future date/time
Emails exist in inbox	1. Select email.2. Move to folder or apply label.	Any email
Signature/template configured in settings	1. Create new email.2. Apply template/signature.	Configured template/signature
Compliance policies configured	1. Compose email containing restricted content.2. Attempt to send.	Content triggering compliance rule
Email server is unavailable	1. Attempt inbox sync or send email.2. Observe system response.	Mail server unavailable

Expected Result	Priority	Type	Status
Task is created successfully and appears in the correct board column/list.	High	Positive	PASS
Validation error is displayed and task is not created.	High	Negative	PASS
Assignee is updated successfully and notification is sent.	High	Positive	PASS
Task status updates successfully and persists after refresh.	High	Positive	PASS
System blocks action or flags task as overdue according to business rules.	Medium	Negative	PASS
Subtask is created and displayed under the parent task.	Medium	Positive	PASS
Comment and attachment are saved successfully.	Medium	Positive	PASS
Upload is rejected with a clear validation message.	Medium	Negative	PASS
Only matching tasks are displayed.	Medium	Positive	PASS
Access is denied and board is not visible.	High	Negative	PASS
Task is deleted successfully and no longer appears after refresh.	Medium	Positive	PASS
System handles conflict gracefully without data loss and displays conflict handling if applicable.	Low	Negative	PASS

Expected Result	Priority	Type	Status
Timer starts successfully and elapsed time increments continuously.	High	Positive	PASS
Timer stops and time entry is saved with correct duration.	High	Positive	PASS
Existing timer is stopped automatically or second timer is blocked as per system rules.	High	Negative	PASS
Time entry is created successfully with duration of 1 hour 30 minutes.	High	Positive	PASS
Validation error is displayed and entry is not saved.	High	Negative	PASS
Changes are saved successfully.	Medium	Positive	PASS

System blocks editing and displays appropriate message/request unlock option.	High	Negative	PASS
Timesheet displays correct daily and task-wise totals.	Medium	Positive	PASS
Aggregated totals match recorded time entries.	Medium	Positive	PASS
Entry is rejected or flagged according to business rules.	Medium	Negative	PASS

Expected Result	Priority	Type	Status
Event is created successfully and displayed in the calendar.	High	Positive	PASS
Validation error is displayed and event is not created.	Medium	Negative	PASS
Validation error is displayed and event is not saved.	High	Negative	PASS
Invitation is sent successfully and guest appears in attendee list.	High	Positive	PASS
All recurring event instances are created successfully.	Medium	Positive	PASS
Only selected occurrence is updated while remaining series remains unchanged.	Medium	Positive	PASS
Event is moved successfully and updated time is reflected after refresh.	Medium	Positive	PASS
System displays conflict warning or handles overlap according to business rules.	Low	Negative	PASS
Reminder notification is triggered at configured time.	Medium	Positive	PASS
Event times are displayed correctly according to each user's timezone.	Medium	Positive	PASS
Editing is restricted or event is read-only according to business rules.	Low	Negative	PASS

Expected Result	Priority	Type	Status
File uploads successfully and appears in the file list.	High	Positive	PASS
Upload is rejected with a clear validation message.	High	Negative	PASS
Upload is blocked and appropriate error message is displayed.	Medium	Negative	PASS

Folder is created successfully and displayed in the folder list.	Medium	Positive	PASS
System prevents duplicate creation or automatically renames according to business rules.	Low	Negative	PASS
File name is updated successfully.	Medium	Positive	PASS
File is moved successfully and appears in destination folder only.	Medium	Positive	PASS
File copy is created successfully while original remains unchanged.	Medium	Positive	PASS
Correct file is downloaded successfully and remains intact.	High	Positive	PASS
File preview renders correctly without errors.	Medium	Positive	PASS
File is removed from original location and successfully restored.	Medium	Positive	PASS
Share link is generated successfully and works according to permissions.	Medium	Positive	PASS
Access is denied and appropriate message is displayed.	High	Negative	PASS
Matching files are displayed in search results.	Low	Positive	PASS
Expected Result	**Priority**	**Type**	**Status**
Document is created successfully and auto-saved without manual intervention.	High	Positive	PASS
Formatting is applied correctly and persists after refresh.	Medium	Positive	PASS
Image and table are inserted and rendered correctly.	Medium	Positive	PASS
Changes are synchronized in real time without data loss.	High	Positive	PASS
Selected version is restored successfully.	Medium	Positive	PASS
Document exports successfully with formatting preserved.	Medium	Positive	PASS
Document imports successfully with acceptable formatting preservation.	Low	Negative	PASS
Comment is added successfully and visible to collaborators.	Low	Positive	PASS

Changes synchronize successfully or conflict resolution is presented without data loss.	Low	Negative	PASS
Editing actions are blocked and document remains read-only.	Medium	Negative	PASS
Expected Result	**Priority**	**Type**	**Status**
Data is saved successfully and displayed correctly in cells.	High	Positive	PASS
Formula calculates correctly and returns 15.	High	Positive	PASS
Error is displayed and application remains stable.	Medium	Negative	PASS
Appropriate error message (#DIV/0!) is displayed.	Medium	Negative	PASS
Cross-sheet references calculate and display correctly.	Medium	Positive	PASS
Data is sorted and filtered correctly without data loss.	Medium	Positive	PASS
Chart is generated and rendered correctly based on selected data.	Medium	Positive	PASS
Spreadsheet data imports successfully with correct structure.	Medium	Positive	PASS
System handles import gracefully with warning, truncation, or validation message.	Low	Negative	PASS
Spreadsheet exports successfully with values and formulas preserved where applicable.	Medium	Positive	PASS
Frozen header row remains visible while scrolling.	Low	Positive	PASS
Expected Result	**Priority**	**Type**	**Status**
Presentation is created successfully with at least one slide.	High	Positive	PASS
All objects are added and displayed correctly on the slide.	Medium	Positive	PASS
Slide order is updated successfully and persists after refresh.	Low	Positive	PASS
Selected transition is applied and plays correctly during presentation.	Low	Positive	PASS
Slides display in full-screen mode and navigation functions correctly.	Medium	Positive	PASS
Presentation exports successfully with slide formatting preserved.	Medium	Positive	PASS

Presentation imports successfully with acceptable formatting preservation; minor animation loss is acceptable.	Low	Negative	PASS
System handles file gracefully, displays warning if needed, and does not crash.	Low	Negative	PASS
Changes synchronize successfully without data loss.	Medium	Positive	PASS
Editing actions are blocked and presentation remains read-only.	Medium	Negative	PASS

Expected Result	Priority	Type	PASS
PDF renders correctly and all pages are viewable.	High	Positive	PASS
Annotation is added and saved successfully.	Medium	Positive	PASS
Form field values are saved successfully.	Medium	Positive	PASS
Signature is successfully applied and retained.	Medium	Positive	PASS
PDFs are merged successfully into a single document.	Medium	Positive	PASS
Selected pages are split correctly into separate PDF files.	Medium	Positive	PASS
Matching text occurrences are found and highlighted.	Low	Positive	PASS
No results are returned and user receives a clear message indicating OCR is required.	Low	Negative	PASS
System prompts for password or blocks access.	Medium	Negative	PASS
Error is handled gracefully and application does not crash.	Medium	Negative	PASS
Downloaded PDF is intact and includes saved annotations.	Medium	Positive	PASS

Expected Result	Priority	Type	Status
Meeting room opens successfully with audio and video enabled.	High	Positive	PASS
User joins the meeting successfully.	High	Positive	PASS
Error message is displayed and user cannot join the meeting.	Medium	Negative	PASS
Audio is muted and unmuted successfully.	Medium	Positive	PASS

Video feed is disabled and enabled successfully.	Medium	Positive	PASS
Shared content is visible to other meeting participants.	Medium	Positive	PASS
User receives clear guidance to enable permissions and meeting remains functional where possible.	High	Negative	PASS
Message is delivered and visible to participants.	Low	Positive	PASS
Recording is saved successfully and accessible after meeting.	Medium	Positive	PASS
Meeting degrades gracefully with minimal disruption, prioritizing audio where applicable.	Low	Negative	PASS
Additional participant is blocked or queued according to system rules.	Low	Negative	PASS

Expected Result	Priority	Type	Status
Message is delivered successfully and displayed in chat history.	High	Positive	PASS
Message is not sent and system prevents empty submissions.	Low	Negative	PASS
Message is delivered and visible to all group members.	High	Positive	PASS
File is uploaded, delivered successfully, and downloadable by recipients.	Medium	Positive	PASS
Upload is rejected with an appropriate validation message.	Medium	Negative	PASS
Reaction is displayed correctly on the message.	Low	Positive	PASS
Read receipt status updates correctly for sender.	Low	Positive	PASS
Matching messages are returned in search results.	Low	Positive	PASS
Message is queued and sent after reconnection, or user receives appropriate error message.	Medium	Negative	PASS
User receives notification for the new message.	Low	Positive	PASS

Expected Result	Priority	Type	Status
Account connects successfully and inbox synchronization begins.	High	Positive	PASS

Connection fails and clear error message is displayed.	High	Negative	PASS
Email is sent successfully and appears in Sent folder.	High	Positive	PASS
Validation error is displayed and email is not sent.	Medium	Negative	PASS
Email is sent successfully with attachment included.	Medium	Positive	PASS
Attachment is rejected and appropriate validation message is displayed.	Medium	Negative	PASS
Reply and forwarded emails are sent successfully and maintain thread information where applicable.	Medium	Positive	PASS
Matching emails are displayed in search results.	Low	Positive	PASS
Draft is saved successfully and email is sent at scheduled time.	Medium	Positive	PASS
Email is organized into selected folder/label successfully.	Low	Positive	PASS
Signature and template content are automatically applied.	Low	Positive	PASS
Email sending is blocked according to compliance/security policies.	Medium	Negative	PASS
User receives clear error message and retry option without application failure.	Medium	Negative	PASS
